Overall Value Proposition

The Agile Patient Journey is a turnkey technology and content solution that addresses the acquisition journey without the overhead and complexity of similar systems. KORCOMPTENZ's secure, scalable architecture allows organizations to launch quickly and effectively, generating real results with the ability to integrate additional data, systems, and ongoing advocacy after launch.

Why Patient Journeys?

Journeys are one of the hottest trends in the marketing technology industry, promising superior results and reduced costs through a combination of more personalized, consistent engagement with customers and prospects, and improved automation. The numbers are staggering: 54% greater return on marketing investment, 56% more cross- and up-sell revenue, 3.5 times greater referral revenue, and an 18 times faster average sales cycle for starters.

Key Benefits

- Acquire more patients at a higher return on investment, and increase targeted outreach by evaluating and segmenting patients with automated follow up
- Decrease your time to market and enhance over time including the ability to add additional service lines and integrate with external systems like CRMs and EMRs
- Increase your ability to measure campaign effectiveness and return on investment with improved reporting over traditional web metrics
- Improve outcomes and reduce readmissions over time with expanded patient lifecycle support for post-surgical campaigns

Six Reasons for Patient Journeys

The Patient Journey Begins Here

A potential patient is prompted to visit a portal dedicated to the therapeutic area and take action

Marketing Campaign
Search | Social

Campaign Portal
Value Proposition | Calls to Action
